**Protocols Specifications for free range pork and grass fed beef and sheep:**

We represent the correct farming practices of raising our animals in a caring and humane manner.

- **Feedlots**- are prohibited.
- **Growth Hormone stimulants and antibiotics**- are prohibited unless antibiotics are needed for a sick or injured animal. In the case of an injury or sickness, the local Vet, specialising in farm animals, is called to determine the correct diagnosis and treatment, which will be applied accordingly.
- **Feed comprises:**
  - **Pigs** – natural grasslands, lucerne, fruit, whey supplemented with a balanced nutritional diet.
  - **Beef and Lamb** – natural grasslands and lucerne. Grain is not allowed as part of their diet.
  - **Beef** - the occasional vitamin energy blocks are provided.
  - **In all instances** – our animals are given adequate space to move around and interact with one another.
- **Water** – our animals are given access to clean and fresh spring water at all times.
- **Comfort** – we provide the appropriate shelters and bedding for resting areas to protect our animals ensuring that they are happy and comfortable at all times.
- **Abattoir** – we make use of a registered abattoir, who use humane animal handling procedures and provide a separate holding pen for our animals to ensure that they remain calm and without stress.
- **Accountability and traceability** – we take pride in providing a good and healthy quality product through our in-house butchery manned by qualified staff, with each and every product labelled adequately for traceability from farm to fork
